## EXPERIENCE

### Freelance Full-Stack Developer

January 2023 - Present

## EDUCATION

### Selçuk University, Konya/Turkey — Bachelor's Degree

2019 - 2023

Faculty of Law

## PROJECTS

### [Quote Generator - Spring Boot:](#)

A full-stack Quote Generator application built with Java, Spring Boot on the backend, paired with Vue.js and TypeScript on the frontend. It allows users to create, search, edit, and delete quotes, featuring pagination and an intuitive user interface.

### [MP3-Metadata-Viewer-Maven:](#)

A Maven-based Java project that extracts and displays metadata from MP3 files using the mp3agic library. This tool provides a simple and efficient way to analyze and view information such as artist, album, title, and more.

### [Crypto-Price-Track-Angular:](#)

It features live updates, detailed charts, and market trends, providing users with the latest information on various cryptocurrencies.

### [Python-Task-Scheduling:](#)

This project is designed to facilitate efficient task scheduling and management for backend operations using Python. Docker is utilized to containerize the application, providing a consistent and reproducible environment for deployment.

***These are just a few of my projects. For a complete list and further details, please visit my [GitHub profile](#).***

## SKILLS

### Frontend:

- Vue
- React
- Angular
- HTML
- CSS
- SCSS
- JavaScript
- TypeScript
- Bootstrap
- Axios
- IndexedDB
- Dexie.js

### Backend:
